PROFILE

As a trained electronics engineer, I am really passionate about the IT world. I am a curious person who is attracted to new gadgets and the technology behind them, and is interested in how to connect different devices.

In 2019, my family and I moved to Sweden. I started learning Swedish and it reminded me how much I like new challenges.

I love learning new things, I learned new languages but also new skills that were needed in my work. I think this is the best way to get better.

SKILLS

- Web development
- Basic SW design, understanding
- Release management for mobile devices
- Experience in planning, scheduling and time management
- Localisation testing for user interface (UI)
- Selling and customer service

EXPERIENCE

IT-consultant   Apr. 2023 – present
Academic Work

I am available full-time as a consultant via Academic Work and can start work immediately. After 12 intensive weeks, I have graduated from the Academic Work/Brights program in JavaScript where I learned about modern techniques in web development.
